

The digital door viewer is designed to replace the traditional peephole viewer with a new electric system, giving the viewer clear and high quality images.

- **Disadvantages of traditional door viewer:**

Image quality is poor.
The user, to see an image, must put an eye close to the viewer and this darkens the peephole, alerting the visitor that someone is in the house.
The position of the viewer is too high for young children to use.
People with sight disabilities may have difficulties in getting a clear image.

- **Advantages of digital door viewer:**

Easy to operate. Just press the button to view image on the LCD screen.
A large clear image of the visitors will appear, irrespective of height or distance.
Easy for children to operate.
The large clear image makes it easier for people with reduced sight to view.

- **Installation:**
Very easy to install in new installations or to replace in doors with existing traditional door viewers. No damage to the door will be done and no new wiring in the door is requested.
- **Specifications:**
LCD screen: 3.5" TFT
Power sources: 4x AA batteries (At 8 seconds viewing cycles, in normal operation, the batteries will last for one year)
- Door thickness: 43-72 mm.
Peephole barrels: 14-22 mm
Size: 135 x 85 x 24.3 mm

Finish: Silver # 22.04.500
